OCT - 1 2002

Dear Species List Requester:

We (U.S. Fish and Wildlife Service) are providing the information you requested to assist your determination of possible impacts of a proposed project to species of Federal concern. Attachment A includes the listed threatened and endangered species, species proposed for listing, candidate species, and/or species of concern that may be within the area of your proposed project.

Any Federal agency, currently or in the future, that provides funding, permitting, licensing, or other authorization for this project must assure that its responsibilities under section 7(a)(2) of the Endangered Species Act of 1973, as amended (Act), are met. Attachment B outlines the responsibilities of Federal agencies for consulting or conferencing with us.

If both listed and proposed species occur in the vicinity of a project that meets the requirements of a major Federal action (i.e., "major construction activity"), impacts to both listed and proposed species must be considered in a biological assessment (BA) (section 7(c); see Attachment B). Although the Federal agency is not required, under section 7(c), to address impacts to proposed species if listed species are not known to occur in the project area, it may be in the Federal agency's best interest to address impacts to proposed species. The listing process may be completed within a year, and information gathered on a proposed species could be used to address consultation needs should the species be listed. However, if the proposed action is likely to jeopardize the continued existence of a proposed species, or result in the destruction or adverse modification of proposed critical habitat, a formal conference with us is required by the Act (section 7(a)(4)). The results of the BA will determine if conferencing is required.

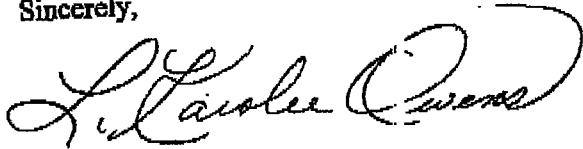

The Federal agency is responsible for making a determination of the effects of the project on listed species and/or critical habitat. For a Federal agency determination that a listed species or critical habitat is likely to be affected (adversely or beneficially) by the project, you should request section 7 consultation through this office. For a "not likely to adversely affect" determination, you should request our concurrence through the informal consultation process.

Candidate species and species of concern are those species whose conservation status is of concern to us, but for which additional information is needed. Candidate species are included as an advance notice to Federal agencies of species that may be proposed and listed in the future. Conservation measures for candidate species and species of concern are voluntary but recommended. Protection provided to these species now may preclude possible listing in the future.

For other federally listed species that may occur in the vicinity of your project, contact the National Marine Fisheries Service (NOAA Fisheries) at (360) 753-9530 to request a list of species under their jurisdiction. For wetland permit requirements, contact the Seattle District of the U.S. Army Corps of Engineers for Federal permit requirements and the Washington State Department of Ecology for State permit requirements.

Thank you for your assistance in protecting listed threatened and endangered species and other species of Federal concern. If you have additional questions, please contact Yvonne Dettlaff (360) 753-9582.

Sincerely,

for Ken S. Berg, Manager
Western Washington Fish and Wildlife Office

**LISTED AND PROPOSED ENDANGERED AND THREATENED SPECIES, CRITICAL
HABITAT, CANDIDATE SPECIES, AND SPECIES OF CONCERN THAT MAY
OCCUR IN THE VICINITY OF THE PROPOSED
WHITE CENTER AREA PARK LANE HOME PROJECT
IN KING COUNTY, WASHINGTON**

(T23N R4E S6)

FWS REF: 1-3-02-SP-2147

LISTED

Wintering bald eagles (*Haliaeetus leucocephalus*) may occur in the vicinity of the project. Wintering activities occur from October 31 through March 31.

Bull trout (*Salvelinus confluentus*) may occur in the vicinity of the project.

Major concerns that should be addressed in your biological assessment of the project impacts to listed species include:

1. Level of use of the project area by listed species;
2. Effect of the project on listed species' primary food stocks, prey species, and foraging areas in all areas influenced by the project; and
3. Impacts from project construction (i.e., habitat loss, increased noise levels, increased human activity) that may result in disturbance to listed species and/or their avoidance of the project area.

PROPOSED

None

CANDIDATE

None

CRITICAL HABITAT

None

SPECIES OF CONCERN

The following species of concern have been documented in the county where the project is located. These species or their habitat could be located on or near the project site. Species in bold were specific occurrences located on the database within a 1-mile radius of the project site.

Beller's ground beetle (*Agonum belleri*)
California wolverine (*Gulo gulo luteus*)
Cascades frog (*Rana cascadae*)
Hatch's click beetle (*Eanus hatchi*)
Long-eared myotis (*Myotis evotis*)
Long-legged myotis (*Myotis volans*)
Northern goshawk (*Accipiter gentilis*)
Northwestern pond turtle (*Clemmys marmorata marmorata*)
Olive-sided flycatcher (*Contopus cooperi*)
Pacific fisher (*Martes pennanti pacifica*)
Pacific Townsend's big-eared bat (*Corynorhinus townsendii townsendii*)
Pacific lamprey (*Lampetra tridentata*)
Peregrine falcon (*Falco peregrinus*)
River lamprey (*Lampetra ayresii*)
Valley silverspot (*Speyeria zerene bremeri*)
Western toad (*Bufo boreas*)
Aster curtus (white-top aster)

ATTACHMENT B

FEDERAL AGENCIES' RESPONSIBILITIES UNDER SECTIONS 7(a) AND 7(c) OF THE ENDANGERED SPECIES ACT OF 1973, AS AMENDED

SECTION 7(a) - Consultation/Conference

- Requires:
1. Federal agencies to utilize their authorities to carry out programs to conserve endangered and threatened species
 2. Consultation with the U.S. Fish and Wildlife Service (FWS) when a Federal action may affect a listed endangered or threatened species to ensure that any action authorized, funded, or carried out by a Federal agency is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat. The process is initiated by the Federal agency after it has determined if its action may affect (adversely or beneficially) a listed species; and
 3. Conference with the FWS when a Federal action is likely to jeopardize the continued existence of a proposed species or result in destruction or an adverse modification of proposed critical habitat.

SECTION 7(c) - Biological Assessment for Construction Projects *

Requires Federal agencies or their designees to prepare a Biological Assessment (BA) for construction projects only. The purpose of the BA is to identify any proposed and/or listed species that is/are likely to be affected by a construction project. The process is initiated by a Federal agency in requesting a list of proposed and listed threatened and endangered species (list attached). The BA should be completed within 180 days after its initiation (or within such a time period as is mutually agreeable). If the BA is not initiated within 90 days of receipt of the species list, please verify the accuracy of the list with the Service. No irreversible commitment of resources is to be made during the BA process which would result in violation of the requirements under Section 7(a) of the Act. Planning, design, and administrative actions may be taken; however, no construction may begin.

To complete the BA, your agency or its designee should (1) conduct an onsite inspection of the area to be affected by the proposal, which may include a detailed survey of the area to determine if the species is present and whether suitable habitat exists for either expanding the existing population or potential reintroduction of the species; (2) review literature and scientific data to determine species distribution, habitat needs, and other biological requirements; (3) interview experts including those within the FWS, National Marine Fisheries Service, state conservation department, universities and others who may have data not yet published in scientific literature; (4) review and analyze the effects of the proposal on the species in terms of individuals and populations, including consideration of cumulative effects of the proposal on the species and its habitat; (5) analyze alternative actions that may provide conservation measures; and (6) prepare a report documenting the results, including a discussion of study methods used, any problems encountered, and other relevant information. Upon completion, the report should be forwarded to our Endangered Species Division, 510 Desmond Drive SE, Suite 102, Lacey, WA 98503-1273.

"Construction project" means any major Federal action which significantly affects the quality of the human environment (requiring an EIS), designed primarily to result in the building or erection of human-made structures such as dams, buildings, roads, pipelines, channels, and the like. This includes Federal action such as permits, grants, licenses, or other forms of Federal authorization or approval which may result in construction.

**SUBJECT: NEPA Documentation for Park Lane Home Project - Seattle, WA
(T23N R04E S06)**

We've searched the Natural Heritage Information System for information on significant natural features in your project area. Currently, we have no records for rare plants or high quality ecosystems in the vicinity of your project.

The information provided by the Washington Natural Heritage Program is based solely on existing information in the database. In the absence of field inventories, we cannot state whether or not a given site contains high quality ecosystems or rare species; there may be significant natural features in your study area of which we are not aware.

The Washington Natural Heritage Program is responsible for information on the state's rare plants as well as high quality ecosystems. We have begun to add information to our database on selected groups of animals of conservation concern, such as freshwater mussels, butterflies and bats. However, to ensure that you receive information on all animal species of concern, please contact Priority Habitats and Species, Washington Department of Fish and Wildlife, 600 Capitol Way N, Olympia, WA 98501-1091, or by phone (360) 902-2543.

If you have internet access, please visit our website for more information. Lists of rare plants and their status, as well as rare plant fact sheets, are available for download from the site. You will find us listed under *Programs & Topics* on the WA DNR homepage at www.dnr.wa.gov. Please call me at (360) 902-1667 if you have any questions, or by E-Mail: sandra.moody@wadnr.gov.

Sincerely,

TO: Terry McCann
FROM: Jane Preuss
DATE: December 27, 2002
FILE: 01329-00340
SUBJECT: Status with respect to Existing Conditions for Plants, Animals and their Habitats

I. Critical Plants and Animals

Dawn Keegan submitted requests to obtain data concerning critical species and habitats as listed below:

1. Washington Department of Fish and Wildlife

Database information request, Report dated September 23, 2002 indicates the adjacent wetland area as critical habitat. (Report is 9 pages) Request submitted for the following categories:

- Priority Habitats & Species
- Wildlife Heritage Point
- National Wetlands Inventory
- Streamnet Database*
- Marine Resources Database
- Spotted Owl
- Other

*Refers to Priority Anadromous and Resident Fish Presence in the Duwamish waterway

2. Washington Department of Natural Resources-

Request for search of Natural Heritage Information System for information on significant natural features. Letter received dated September 24, 2002 stated that the DNR has no records of rare plants or high quality eco-systems in the vicinity of the project. (Letter is 1 page)

3. U.S. Fish and Wildlife Service

Species of Concern request indicating possible presence of listed and proposed endangered and threatened species, critical habitat, candidate species and species of concern that may occur in the vicinity. Letter of response dated October 1, 2002 is attached (3 pages)

II. Reviewed Draft tree inventory prepared by Urban Forestry Services, Inc. and developed request for summary to be included under the Existing Conditions Section of the DEIS.

The summary to be prepared by Urban Forestry Services would develop two tables: 1) Risk of Failure Criteria and number of trees in each category and 2) Preservation Values with number of trees in each category. If possible a map of the trees with special preservation values would be included.

RE: Park Lake Homes
Project Number: 2002-054-002

MEMO:

Hello, We are conducting a plant and wildlife assessment for a 95-acre parcel in unincorporated King County. The site is located within Section 6, Township 23 North, Range 4 East, W.M. in King County, Washington. I have enclosed a vicinity map showing the site for your information.

We would appreciate any information you have regarding wildlife species and significant ecosystems documented near this site. Of particular interest are species listed as endangered, threatened, or sensitive, and information regarding high-quality ecosystems in the area. **Specifically, we would like to order the 7.5 Minute Quadrangle for the Seattle South and Duwamish Head quadrangles (1:24,000 scale), and the PHS database reports that accompany the quadrangle.**

Please notify our office regarding the fees associated with this request. If you have any questions, please call me at (206) 525-8122. Please send this information as soon as you are able to process the request. As always, thank you very much for your timely assistance.

Dear Habitats and Species Requester:

Enclosed are the habitats and species products you requested from the Washington Department of Fish and Wildlife (WDFW). This package may also contain documentation to help you understand and use these products.

These products only include information that WDFW maintains in a computer database. They are not an attempt to provide you with an official agency response as to the impacts of your project on fish and wildlife, nor are they designed to provide you with guidance on interpreting this information and determining how to proceed in consideration of fish and wildlife. These products only document the location of important fish and wildlife resources to the best of our knowledge. It is important to note that habitats or species may occur on the ground in areas not currently known to WDFW biologists, or in areas for which comprehensive surveys have not been conducted. Site-specific surveys are frequently necessary to rule out the presence of priority habitats or species.

Your project may require further field inspection or you may need to contact our field biologists or others in WDFW to assist you in interpreting and applying this information. Generally, for assistance on a specific project, you should contact the WDFW Habitat Program Manager for your county and ask for the area habitat biologist for your project area. Refer to the enclosed directory for those contacts.

Please note that sections potentially impacted by spotted owl management concerns are displayed on the 1:24,000 scale standard map products. If specific details on spotted owl site centers are required they must be requested separately.

These products are designed for users external to the forest practice permit process and as such, does not reflect all the information pertinent to forest practice review. The Forest Practice Rules adopted August 22, 1997 by the Forest Practice Board and administered by the Washington Department of Natural Resources require forest practice applications to be screened against marbled murrelet detection areas and detection sections. Marbled murrelet detection locations are included in the standard priority habitats and species products, but the detection areas and detection sections are not included. If your project is affected by Forest Practice Regulations, you should specially request murrelet detection areas.

WDFW updates this information as additional data become available. Because fish and wildlife species are mobile and because habitats and species information changes, project reviews for fish and wildlife should not rest solely on mapped information. Instead, they should also consider new information gathered from current field investigations. Remember, habitats and species information can only show that a species or habitat type is present, they cannot show that a species or habitat type is not present. These products should not be used for future projects. Please obtain updates rather than use outdated information.

Because of the high volume of requests for information that WDFW receives, we need to charge for these products to recover some of our costs. Enclosed is an invoice itemizing the costs for your request and instructions for submitting payment.

Please note that sensitive information (e.g., threatened and/or endangered species) may be included in this request. These species are vulnerable to disturbances and harassment. In order to protect the viability of these species we request that you not disseminate the information as to their whereabouts. Please refer to these species presence in general terms. For example: "A Peregrine Falcon is located within two miles of the project area".

If your request required a Sensitive Fish and Wildlife Information Release Agreement and you or your organization has one on file, please refer to that document for conditions regarding release of this information.

For more information on WDFW you may visit our web site at <http://www.wa.gov/wdfw> or visit the Priority Habitats and Species site at <http://www.wa.gov/wdfw/hab/phspage.htm>.

For information on the state's endangered, threatened, and sensitive plants as well as high quality wetland and terrestrial ecosystems, please contact the Washington Department of Natural Resources, Natural Heritage Program at PO Box 47014, Olympia Washington 98504-7014, by phone (360) 902-1667 or visit the web site at <http://www.wa.gov/dnr/htdocs/fr/nhp/wanhp.html>.

If you have any questions or problems with the information you received please call me at (360) 902-2543 or fax (360) 902-2946.

Sincerely,

Lori Guggenmos, GIS Programmer

The fish information in this report only includes information that Washington Department of Fish and Wildlife (WDFW) maintains in a central computer database. This information only documents the location of important fish resources to the best of our knowledge. It is not a complete inventory of the fish species in the state. Fish are identified as priority by WDFW if they meet one of three criterion as listed in the Priority Habitats and Species List. The list is available by contacting WDFW Priority Habitats and Species section at (360)902-2543 or it is available on our web site at <http://www.wa.gov/wdfw/hab/phspage.htm>. To insure appropriate use of this information users are encouraged to consult with WDFW biologists.

INITIATION OF SECTION 106 PROCESS and APE DEFINITION

June 18, 2003

Dr. Allyson Brooks
State Historic Preservation Officer
Office of Archaeology and Historic Preservation
P.O. Box 48343
Olympia, WA 98504-8343

King County DDES
Greenbridge (formerly Park Lake Homes)
County File No. A03P0059

Dear Dr. Brooks:

King County Housing Authority (KCHA) is proposing redevelopment of Greenbridge (formerly known as Park Lake Homes I) under the U.S. Department of Housing and Urban Development's HOPE VI program. King County Department of Development and Environmental Services (KC DDES) and KCHA are preparing a joint NEPA/SEPA document to satisfy the requirements of state and federal environmental statutes. KC DDES, as the NEPA responsible entity, has determined that the redevelopment is an "undertaking" pursuant to 36 CFR § 800.16(y) and, therefore, subject to Section 106 to the National Historic Preservation Act of 1966, amended 1992 (NHPA).

The proposed project is redevelopment of an approximately 90 acre public housing community in the NW¼ of NE¼ and NE¼ of NW¼, Section 6, T. 23 N., R. 4 E.. The area is known as White Center (see Figure 1). The existing housing was built in 1942-43 by the federal government as housing for workers in World War II defense plants. Since the 1950s it has been owned by the KCHA and rented to low-income residents. KCHA proposes demolishing the existing housing and replacing it with a mix of rental and privately-owned properties.

Pursuant to compliance with Section 106 of the NHPA and 36 CFR § 800.4(a)(1), the KC DDES is hereby initiating consultation for this project. KC DDES requests your assistance in confirming the project's Area of Potential Effect (APE), which is defined as the existing Park Lake Homes I development and selected adjacent properties (see Figure 2). The project is irregularly shaped but is generally bound by SW Roxbury St. on the north, SW 102nd Street to the south, 11th Avenue SW to the west, and 3rd Avenue SW to the east. Areas that are

surrounded on three sides by the proposed Greenbridge project have been included in the APE as the proposed redevelopment may directly or indirectly cause alterations in the character or use of these properties.

The KC DDES also initiated consultation on June 18, 2003 with the following local tribes: Muckleshoot, Suquamish, Puyallup, Snoqualmie, and Tulalip. We have also contacted the Duwamish Tribe requesting comment on the project. Pursuant to 36 CFR § 800.3(f) we request your assistance in identifying any other parties entitled to be consulting parties. We request that your comments be submitted to us by July 18, 2003

If you have any questions, please feel free to contact me at (206) 296-7118. Thank you for your assistance.

Sincerely,

A handwritten signature in cursive script that reads "Greg Borba".

Re: Area of Potential Effect, HOPE VI Program Redevelopment of Greenbridge

Dear Mr. Borba:

Thank you for contacting the Washington State Office of Archaeology and Historic Preservation (OAHP) regarding the above referenced action. This consultation is in conformance with Section 106 of the National Historic Preservation Act and its implementing regulations 36CFR800. From your letter, I understand that the King County Housing Authority proposes redevelopment of Greenbridge under the U.S. Department of Housing and Urban Development (HUD) HOPE VI program.

In response and on behalf of the State Historic Preservation Officer (SHPO), I have reviewed the materials forwarded to our office. As a result of this review, I concur with the definition of the APE. Therefore, I look forward to the results of your cultural resources survey efforts, your consultation with the concerned tribes, and receiving the survey report. We would appreciate receiving any correspondence or comments from concerned tribes or other parties that you receive as you consult under the requirements of 36CFR800.4(a)(4).

Again, thank you for the opportunity to review and comment on this action. Should you have any questions, please feel free to contact me at 360-586-3073 or gregg@cted.wa.gov.

Sincerely,

Gregory Griffith
Deputy State Historic Preservation Officer

INITIATION OF CONSULTATION

June 18, 2003

Richard Young
Tulalip Tribe
7615 Totem Beach Road
Marysville, WA 98271

King County DDES
Greenbridge (formerly Park Lake Homes I)
County File No.A03P0059

Dear Mr. Young:

King County Housing Authority (KCHA) is proposing redevelopment of Greenbridge (formerly known as Park Lake Homes I) under the U.S. Department of Housing and Urban Development's HOPE VI program. King County Department of Development and Environmental Services (KC DDES) and KCHA are preparing a joint NEPA/SEPA document to satisfy the requirements of state and federal environmental statutes. KC DDES, as the NEPA responsible entity, has determined that the redevelopment is an "undertaking" pursuant to 36 CFR § 800.16(y) and, therefore, subject to Section 106 to the National Historic Preservation Act of 1966, amended 1992 (NHPA).

The proposed project is redevelopment of an approximately 90 acre public housing community in the NW¼ of NE¼ and NE¼ of NW¼, Section 6, T. 23 N., R. 4 E.. The area is known as White Center (see Figure 1). The existing housing was built in 1942-43 by the federal government as housing for workers in World War II defense plants. Since the 1950s it has been owned by the KCHA and rented to low-income residents. KCHA proposes demolishing the existing housing and replacing it with a mix of rental and privately-owned properties.

Pursuant to compliance with Section 106 of the NHPA and 36 CFR § 800.4(a)(1), the KC DDES is hereby initiating consultation for this project. KC DDES invites you to comment on the project's potential effect (*see* Area of Potential Effect (APE), which is defined as the existing Park Lake Homes I development and selected adjacent properties - Figure 2). The Project is irregularly shaped but is generally bound by SW Roxbury St. on the north, SW 102nd Street to the south, 11th Avenue SW to the west, and 3rd Avenue SW to the east. Areas that are directly adjacent or surrounded on three sides by the Greenbridge Project have been included in the APE.

Your response to this letter, acknowledging your interest in participating in this undertaking as a consulting party and identifying key tribal contacts, is greatly appreciated. Please provide a response by **July 18, 2003**, so that we may discuss this undertaking and the APE. A request for assistance in confirming the APE was sent to the Office of Archaeology and Historic Preservation on June 18, 2003.

If you have any questions, please feel free to contact me at (206) 296-7118. Thank you for your assistance.
